

Cabin Display Systems

Marilake have been designing and manufacturing cabin displays since the early 80's. We developed three iterations of the cabin display system for the British Airways Concorde fleet and have retro-fit cabin displays flying on a number of major commercial carriers.

We design and manufacture cabin display products according to customer requirements and can offer a multitude of display types, presentations and functions.

Capabilities

Media rich displays can be integrated with aircraft information for air data presentation.

Integration with cabin lighting to change ambiance with lighting level.

Corporate colours, illuminated logos and cabin 'look and feel' can all be incorporated into a design.

Form factor and sign presentation is completely adaptable with different finishes such as metal or wood effect enclosures.

Products released on EASA Form 1.
