

In-Flight Entertainment Systems

Marilake have developed the *flightmaster* IFE product range for over 20 years and have extensive experience in providing highly customised IFE solutions to several commercial airlines and private interests throughout the world.

Capabilities

Real-time air data.

Worldwide multi scale map coverage showing aircraft position, bearing and flight path.

Customised multi language displays.

System shown entirely in your Corporate Image.

Points of Interest module shows facts and pictures of nearby places during flight.

Customisable quizzes and advertising. Safety messages such as 'fasten seatbelts' triggered by discrete input.

Dynamic pages can be displayed based on air data, aircraft type, airport, country or economic zone.

System updates can be installed via CD-ROM on aircraft

System integrates with existing video and IFE, only activating when no video signal is detected.

Products released on EASA Form 1.
